Visualizing Economic Recessions Plan

OVERVIEW & PURPOSE

The purpose of this document is to give a quick overview to the reader of my project draft.

OBJECTIVES

- 1. This weekend I spent hours gathering the links and organizing the data for my citations.
- 2. Next week I will focus on making more advanced visualizations and animated visualizations.
- 3. Over the weekend, I will add my notes and screenshots for my visualizations.

Ideas

- 1. I would like to categorize the data by the recession to display how each affected the economy differently.
- 2. I think it would be interesting to see the recessions animated after one after another.
- 3. As for advanced visualization, I'm still determining.
- 4. I need to link the tables together in Tableau formerly. I downloaded 32 data sets and rolled them up or combined them into categories.
